Re: January Monthly Report

*Greg Wingo*

## **Water Department**

The Water Department has been working on upgrades for the pits and meter setters, sample testing and completing monthly water testing, flushing hydrants, and water line locates and inspections. Water inspections at Heritage Creek and Wagamon's were conducted. We've repaired two hydrants and rebuilt one hydrant. We've been rebuilding street valves and shut off valves. We've had two leaks at the shut off valves and one leak on a hydrant that we have also repaired. We are still awaiting to receive the contract back from the contractor for the work on Shipbuilders Water Tower. I have talked with Matt about the start date and he is coordinating with his sub-contractor for a start date of the concrete work. I have expressed that we need this work completed before the end of April; he said they should not have a problem with having work done by then. Corrosion Control should be starting on the Tower on Chandler Street in the next two weeks. The Water Treatment Plant repairs/upgrades are coming along great.

## **Streets Department**

The Street Department has been busy with cold patching holes in streets, cleaning storm drains, picking up trash off the road, hand sweeping streets, and emptying trash receptacles. We've been very busy trying to keep the storm drains cleaned from leaves and trash running down the curb line. We've started going over every street to trim limbs, bushes and repairing signs. We've been working on the upgrades to the signs. Delmarva Power has started repairing the sidewalks on Chestnut Street. We've cleaned off the Town owned sidewalks, spread salt and cleaned streets Town Wide due to the snow and ice.

## **Parks**

We've spent time keeping limbs, trash, and leaves picked up in all the Parks. Inspections are done on playground equipment each month. We've taken down all Christmas Lights in Memorial Park and we are scheduled to take down the Snow Flakes on Federal St. and Union St. in February.
